IT 4970 Internship		4-8	
IT Electives - Six (6) credits of electives are required to complete the major. ) See undergraduate catalog for listing of electives.			

**II. Required Career Proficiency**

Current State of Minnesota Licensure requirements include work that varies in length and type from one program to another. Advisors in the Career and Technical Education program will assist students in obtaining work experience approval. The following types of experience may be awarded semester hours of credit that will count toward degree requirements up to the maximum semester hours indicated.

Required: Thirty-two (32) semester credits will be awarded for a total of three years of occupational experience within a license category in Career and Technical Education (see the Director of Career and Technical Education). This experience needs to be documented by previous employer(s) and submitted to the Director of Career and Technical Education.

Additional credits could be awarded as follows:

- A two-year technical college degree/diploma from an accredited technical college could count toward degree requirements (maximum of 32 semester credits).
- Verified post high school technical training through workshops, verified clock hour through company in-service, etc., could be assessed for semester credits.
- Military training could count toward the degree (evaluated in the Bemidji State University Admissions Office).

A combined maximum of 64 credits will be given for the above proficiencies. A total of thirty (30) residence semester credits are required to be taken from BSU.

Degree Summary

Required Courses .....	18 credits
Occupational Experience (minimum) .....	32 credits
Technical College Degree/Diploma (maximum) .....	32 credits
Teaching Experience (maximum, however not required) .....	11 credits
Liberal Education .....	42 credits
<b>TOTAL REQUIRED FOR GRADUATION .....</b>	<b>128 credits</b>
