

CONSTRUCTION MANAGEMENT

Department of Technological Studies

The Construction Management emphasis reflects the diverse nature of the contemporary construction industry.

This emphasis consists of a broad-based industrial, technical and professional core of Industrial Technology courses supplemented with construction management applications of building theories and practices.

Our students can be found in management positions in residential home, commercial and industrial construction.

Many students in this emphasis area will pursue a secondary emphasis in Manufacturing Management to enhance their employability in industrial construction.

Possible Careers:
Project Manager and
Engineer, Construction
Supervisor, Independent
Contractor and Civil
Engineering Technician
