

# DESIGN TECHNOLOGY PROGRAM TRANSFER OPTION

## Department of Technological Studies

MnSCU Technical and Community College graduates who have completed a recognized AAS, AS, AA or Diploma Certification in a Design Technology related program may receive up to 27 technology transfer credits to satisfy the 1,000 and 2,000 level courses in the Design Technology required core and the specialization requirements with the major.

Courses that meet the Minnesota Transfer Curriculum will transfer into the goal areas within Bemidji State's Liberal Education requirements. If a student completes an AA Liberal Arts degree in a MnSCU Technical and Community College, no additional liberal arts requirements are needed.

MnSCU Technical and Community College recognized program graduates may also receive an additional block of up to 16 credits of general technical electives toward the 128 credits needed for a Bachelor of Science.
