

How to change your settings in FrontPage to publish using FTP

Open FrontPage and make sure your web site files are open in the folder list.

Click File > Publish Site. The Remote Web Site Properties dialog box should appear.
(If the login screen pops up, click Cancel and try again)

Click FTP in the Remote Web server type section shown below.

Then add **www.bemidjstate.edu** in the Remote Web site location as shown below.

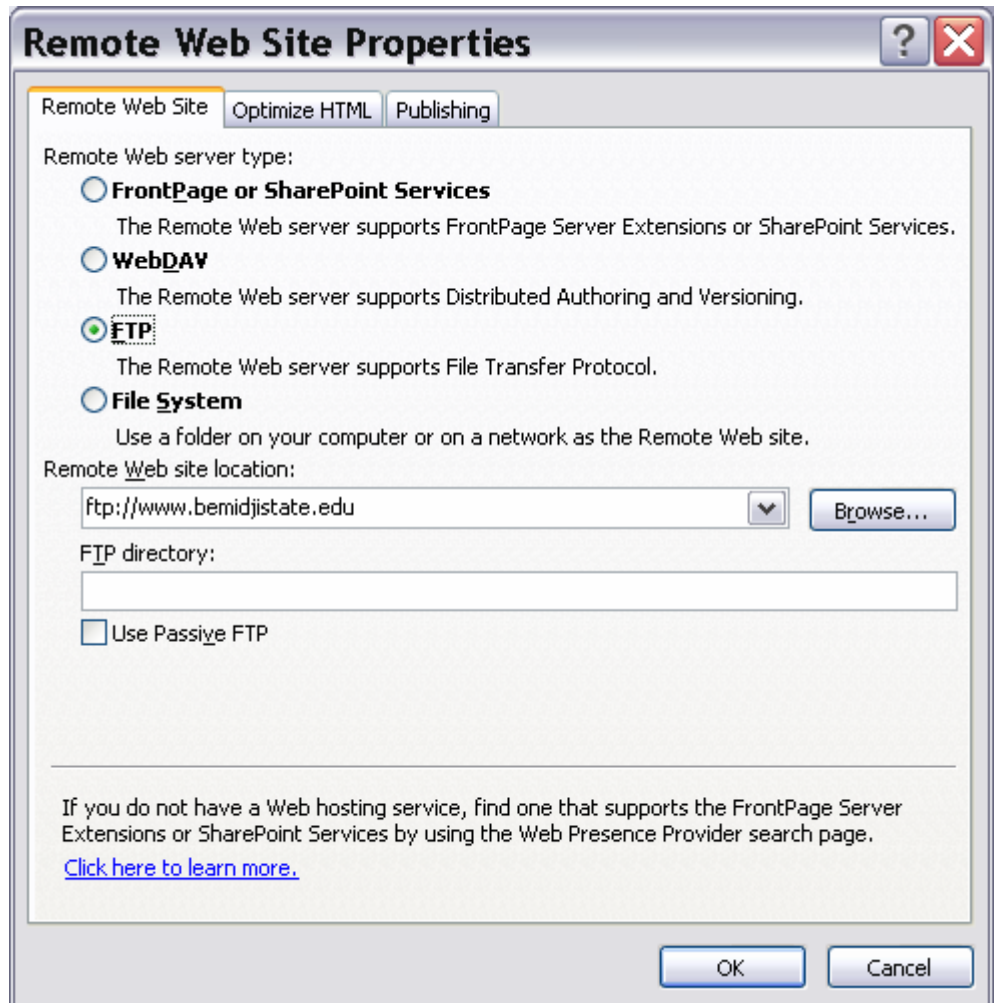

Click OK

Side note:

If you publish to only one site, the location will be **www.bemidjstate.edu**

If you publish to multiple sites you will need to enter each exact site location thereafter.

If you need assistance, please call Tech Support at 755-3777.

The login screen will appear

Type your username and password,
Click OK (you may need to do this twice)

If a Windows Security Alert Box appears, asking if you want to block FrontPage, choose Unblock.
