

Sociology

Sociologists explore dimensions of social life in all its cultural diversity. We explore the complexity of social interactions, communities, and focus on how social inequality is created and perpetuated. We study how all of this affects an individual's life chances.

Sociology is interdisciplinary in nature and excels at integrating knowledge from various disciplines in the social sciences and humanities. This enables us to examine the complexity of life and prepares the student to apply this critical thinking ability to various careers and life in communities.

The sociology curriculum is focused on bridging the gap between theoretical concepts and how these affect lives. A sociology major imparts skills in critical thinking, research design and analysis, communication, and synthesizing information and interpreting it for multiple audiences. Students will find such skills useful for careers such as those indicated.

Minors that complement the sociology curriculum:

Economics, Gender Studies, Political Science, Indigenous Studies, Communication Studies, History, Philosophy, Business

The Sociology curriculum will also prepare you for graduate school in Sociology, Public Policy, Public Administration, Law, Human Resource Management.

Today people point to the fact that we are experiencing a crisis in health care in the U.S. Costs have skyrocketed, access to primary care is inequitable, infant mortality rates remain high, public accountability problems persist, and we continue to emphasize medical care over and above health care.
