Program Learning Outcomes | Aquatic Biology, B.S.

1. **Communicate:** Effectively present research using common, professional formats (written and/or verbal). This includes using figures, graphs, tables, and illustrations to promote dissemination and clarity of knowledge.
2. **Create Purpose or Hypothesis:** Provide justification for the importance of pursuing a project or construct a testable hypothesis (or hypotheses).
3. **Observe and Question:** Integrate information or observations to promote curiosity and question generation.
4. **Recognize Larger Implications:** Demonstrate understanding of the ethical/social dimensions or societal implications of science, recognize inherent biases, and communicate scientific ideas to non-science audiences.
5. **Re-engage:** Demonstrate an ability to re-engage with the research process by identifying sources of error, possible limitations of their research, next steps in a project, or re-designing more appropriate experimental methods/controls.
6. **Research:** Plan and execute research, experiments, data collection, analysis of the results, and/or synthesis of new or coalesced knowledge.
7. **Review Research Literature:** Search and review appropriate sources with a goal of independent information discovery or critically identifying knowledge gaps.
