Job Opportunity
Research Technician

❖ **Job Description:** The MN Department of Natural Resources has an opportunity for students to work as wetland ecology interns throughout the 2018/2019 academic year. Students will work closely with project supervisors and graduate students to implement project work in both the field and lab. If you are a BSU student with an interest in biology, ecology, environmental studies, or related field, we encourage you to apply.

➢ **Qualifications**

- Background in aquatic ecology and experience/interest in associated field and lab work
- Ability to work outdoors for extended periods under adverse weather conditions
- Experience with Microsoft Office Suite
- Strong organizational and communication skills
- Experience in aquatic plant and invertebrate identification preferred

➢ **Tasks**

- Assist field staff with the collection of invertebrate, fish, vegetation, water, and sediment samples
- Process samples in lab and record data

For questions or to apply for this position, please send a brief cover letter and resume to Breanna Keith at Breana.Keith@my.smsu.edu. Interviews will be held September 5th – 7th.
