DOCUMENTATION FOR ALL REQUIREMENTS MUST BE SCANNED AND UPLOADED TO YOUR TCCP STUDENT PASSPORT ACCOUNT BY DECEMBER 1

Immunizations:

- **MMR** – TWO vaccinations or antibody blood testing verifying immunity to measles, mumps, and rubella – *all three components must be tested.*
- **Varicella** – TWO vaccinations or antibody blood testing verifying immunity to varicella. Personal statement that you’ve had the disease is not adequate.
- **Tdap** – must be adult booster that includes *pertussis* component, current within the last 10 years.
- **Hepatitis B** – THREE vaccinations, antibody blood testing, or signed waiver.
- **Influenza** – ANNUAL vaccination will be required for students participating in clinicals during flu season (mid-fall through spring semester of the Junior and Senior year). Not required during the Sophomore year.
  - Exemptions for medical or religious reasons only. Medical reason must be documented by physician.
  - Religious exemption must be notarized documentation.
  - Exempted students must complete clinical facility exemption form and wear masks during flu season.

TB Screening:

- **Initially:** Two-step Mantoux or Quantiferon TB blood testing
  - The two-step Mantoux process requires four trips to the clinic: two injections and two readings. The second injection should be scheduled two to three weeks after the first. Readings must occur between 48-72 hours after the injections. (See document entitled, “How is two-step tuberculin skin testing done?”)
  - If Mantoux or Quantiferon test shows positive result, or if there is a history of positive reaction to TB skin or blood test, a chest x-ray and physician’s follow-up assessment will be required to verify there are no signs of active disease.
- **Annually:** One-step Mantoux or Quantiferon TB blood testing is required throughout program progression.
  - Annual screening must take place within 12 months of the initial screening. Lapses longer than 12 months require another two-step skin test or Quantiferon test.
  - Physician’s follow-up assessment to rule out signs/symptoms of tuberculosis will be required annually in cases where there was an initial chest x-ray. Subsequent x-rays will not be required unless recommended by healthcare provider.

AHA BLS CPR Certification:

- Must be HEALTHCARE PROVIDER or HEARTCODE BLS certification from the American Heart Association (*HEARTSAVER certifications are NOT accepted*). Certification must stay current throughout program completion.

Background Clearance – TWO separate studies to complete:

- National background study: Verified Credentials
  - Cost is $50, unless you’ve lived in Canada ($75) or other country ($250) within the last 7 years.
  - See instructions provided in separate document.
- State background study: DHS NETSTUDY 2.0
  - Cost to student is $9.10 for the finger-printing charge.
  - Students will submit after the start of spring semester. *December 1 deadline does not apply to the DHS study.*
