Bemidji State University
Department of Nursing

Annual Report
2017 - 2018

Year in Review
The academic year 2017-2018 provided many exciting opportunities and challenges. The Department of Nursing will be moving to a new college with a new dean, effective July 1, 2018. The proposed name of the college is the College of Wellness, Social Sciences, and Advocacy, and Dr. Joe Ritter has been hired as the dean. Dr. Ritter currently is the Provost and Dean of Academics at Principia College, Elsah, Illinois. His PhD is in chemical engineering.

The leadership and structure of the Department of Nursing was one of the identified focus areas for future planning. Dr. Marci Maple will assume the position of chair and chief nurse administrator at the start of fall semester 2018. The department will continue with a shared governance model but clarity and a new future vision will influence the educational directions.

Nursing is a proud and caring profession. Our students are meeting the challenges with grace, wisdom and knowledge.

We are working to increase our use of both high and low definition simulation.

Accreditation Work
We successfully completed our CCNE accreditation site visit in November of 2017. Dr. Nancy Hall was our lead CCNE author. All faculty were active and participated in this year-long process. Our self-study is available through BSU’s website. The final determination should be made by CCNE in May of 2018.

Strategic Planning and Marketing Process during 2017-2018
The University started a new strategic planning process in the spring of 2016. Community listening sessions were conducted, including topics related to nursing. During this same time, the Department of Nursing was completing our re-accreditation self-study. Part of the program review included a strengths and opportunities comparison. Once this work was done, it seemed a natural next step to move into a departmental strategic planning process in order to focus on the next three-to-five years.

The process began with a kick-off in December of 2017 and engaging the services of Idea Circle to facilitate our discussion. The faculty were surveyed and a full faculty work day was completed in February of 2018. From this work a draft was developed. Each nursing department committee assumed responsibility for a specific focus area with the goal to review, refine and propose a final draft of that area. The focus areas include: leadership and decision making, student advising, the potential for graduate studies, international and clinical learning experiences.
Vision and Mission

*Department of Nursing Vision:* We educate professional nurses to lead inspired lives.

*Our Mission:* To engage in scholarship that supports the development of critical thinkers, creative problem solvers, and innovative leaders in care delivery.

To teach and support professionalism and professional values in the care of individuals and populations across diverse cultures, ages, and environments.

To educate the baccalaureate nurse generalist for a future that includes lifelong learning and professional practice.

Program Outcomes

*4-Year Pre-licensure Track*

We accepted a total of 63 new students starting the spring of 2018. We are in the process of refining our holistic admission process, which will increase our ability to see the applicants more completely and not just based on their academic records. The new uniforms have been a hit as we switch from polos to scrubs for our hospital settings.

*RN-BS Completion Program*

The RN-BS program remains busy. The department has been reviewing several areas related to this program. As part of our biannual program review, the faculty have reviewed the course learning objectives, the number of credits assigned to each course and course sequencing. A taskforce reviewed the application process because of our concern over the number of students who applied and were accepted into the program but did not actually start the program. (In 2017, out of 310 applicants, 225 registered for classes and only 185 were enrolled at the end of the first week of classes.) The department is working on how to retain these students and better serve their needs. Along with this, the number of hybrid courses—those that include some on-campus meetings—were reviewed and two more classes were moved to totally on-line. The RN-BS program is now 50% totally on-line.
BSU’s program requires 36 nursing course credits, which is higher than other Minnesota State Universities. We are reviewing this credit load as we work to update and improve our curriculum. To obtain a bachelor’s degree a student needs to complete 40 credits of upper division courses (3000 – 4000). Should these course be nursing courses or other general college courses?

Skills Lab

Faculty and student have worked hard to expand their learning through our skills lab and use of high definition simulation. We have added a communication manikin called Alex. He talks and responds to questions! We also have successfully obtained our new simulation mom and simulation newborn baby, enabling us to run a complete birthing simulation. Other new lab equipment includes a crash cart, a personal protection equipment cart, and a geriatric manikin. We are also using online simulation programs such as Shadow Health and Centennial City to expand our RN-BS learning experiences.

Faculty

This year we were able to add two probationary track faculty lines.

![Dr. Julie Caspers and Dr. Tricia Cowan](Image)

**Dr. Julie Caspers**, completed her PhD in nursing from the University of North Dakota. She earned her Bachelors of Science in Nursing from Bemidji State University. Dr. Caspers has clinical experiences in medical surgical nursing, orthopedics, emergency care, palliative care, cardiology, pediatrics, post-partum/newborn care, and psychiatric mental health nursing.

**Dr. Tricia Cowan** earned a Doctor of Nursing Practice, with a focus on Nursing Organizational Leadership, from Winona State University. Dr. Cowan, holds a Master of Science degree in Nursing,
with a focus on nursing education, from Western Governors University. Before teaching, Dr. Cowan’s nursing experience was in psychiatric, medical/surgical, informatics, occupational, and long-term care.

**Sabbaticals**
2017–2018: None
2018–2019: Dr. Jeanine McDermott will be returning to China

**Faculty Completing their Terminal Degrees**
We have two new doctors in the Department of Nursing:
- Dr. Tricia Cowan and Dr. Leslie Darmofal.
- Carrie Yavarow continues in her DNP program.

**Faculty Scholarly Achievements**
Dr. Julie Caspers and Dr. Jessica LeTexier completed a manuscript for a pilot study called Social Media Support of Micropreemie Parents and submitted for publication to Advances in Neonatal Care.

Dr. Tricia Cowan received a Doctor of Nursing Practice degree from Winona State University and completed the evidence-based practice project titled *Attitudes toward Dementia*.

Dr. Leslie Darmofal received a Doctor of Nursing Practice degree from Mankato State University. Her works include:
- Research - National Association of Clinical Nurse Specialists – podium speaker – *Psychological Distress: Transitioning Patients from Survivorship to New Normal*
  Included poster presentations at Mankato Nursing Forum, MN CNS Conference, Sanford Quality Improvement Conference

Dr. Mary Fairbanks launched an online advising project to understand the perceptions of advisees regarding the use of an online learning management system (D2L Brightspace) for academic advising. She also wrote the Human Subjects section of the successfully-awarded HRSA grant.

Dr. Nancy Hall served as the primary author for the CCNE self-study report. She continues working with advanced directives and end-of-life planning. She presented at the Minnesota Age and Disabilities Conference, the Honoring Choices Conference, the Minnesota Hospice and Palliative Care Conference, and the Midwest Geriatric Nursing Education Alliance meeting, as well as a webinar sponsored by Stratis Health’s Rural Palliative Care Initiative.

Dr. Tiffany Hommes, Dr. Julie Caspers, and Dr. Tara Pierce are working on a pilot study titled, “To Simulate or Not.”
Dr. Tiffany Hommes published a manuscript titled: The Significance of Physical Education in American Schools, in the *Nursing and Care Open Access Journal*.

Dr. Jessica LeTexier is also collaborating on a research project with Dr. Mary Fairbanks on the use of Online Advising for Improving Relationships with Advisees.

Dr. Marci Maple is the President Elect of the National Society for Advancement of Modeling and Role-Modeling (SAMRM) organization and chair of the planning committee for the international SAMRM nursing conference to be held in Bemidji on Sept. 19-22, 2018.

Dr. Jeanine McDermott collaborated with BSU Student Wellness Initiative lead directors to develop and implement an assessment plan, analyzing the final semester of data from our Seed and Feed research project. She also collaborated with Dr. Nguyen-Moen and Dr. Townsend in the development of a research project titled: “Challenges and benefits of developing, implementing and evaluating an international cultural immersion program in China: From the beginning to the end.”

Dr. Christine Nguyen-Moen is working on a student nurse collaboration/exchange programs with Jinhua Polytechnic in China and possibly something in Vietnam.

Dr. Tara Pierce plans to repeat the “To Simulate or Not” study with NRSG 4120 Community health Practicum using an updated version of the simulation product.

Dr. Sarah Tarutis: “My true love is direct patient care and I have valiantly kept a foot in both the clinical and academic arenas. This has been important to me, because I value professionals who ‘do’ and ‘practice’ what we teach.”

Dr. Carolyn Townsend gave a presentation at the Midwest Nursing Research Society (MNRS) 41st Annual Research Conference entitled “Feed Them and Will They Keep Coming?”

Carrie Yavarow continues working on a Doctorate of Nursing Practice at Mankato State University with anticipated graduation in December 2020.

Dr. Misty Wilkie is serving as the principal investigator and program director of HRSA grant: Niganawenimaanaanig Program (2017-2021).

**Department of Nursing Standing Committee Reports**

**Academic Resource Committee**

The Academic Resource Committee worked to acquire two new simulation manikins: NewB a high-fidelity newborn simulator, and ALEX a communication manikin. Additionally, a sensory deficit kit and Virtual Dementia Tour were purchased for faculty and students. Through the generosity of a donor, we were able to purchase two personal protective equipment carts to situate outside our simulation rooms, as well as educational posters for our clinic and hospital bays. We are actively working with the BSU Foundation to identify donors to utilize a leverage grant for STEM programs. Our annual faculty resource survey continues to identify equipment and personnel needs to support our program: increased personnel support for simulation, clinical coordinator, course coordinators, etc.

**Curriculum Committee**

The Curriculum Committee continues to review all faculty course evaluations. This year we have moved to an every other year process. The first year all RN-BS courses will be evaluated and the second year all 4-Year Track courses will be evaluated. The Essential assignments for all course will be evaluated annually.
A complete review of the RN-BS program was started during our curriculum retreat in the fall. The committee and faculty have reviewed all of the course objectives and course sequencing. The course objectives were revised as needed. All courses were reviewed for duplication or overlap and content that responds to our current healthcare climate. There will be some curriculum changes put forward in the fall of 2018 as a result of this work. Next year the 4-Year Track pre-licensure program will be reviewed.

**Student Admission, Progression and Concerns Committee**
The student grievance and concerns process was revised and brought into alignment with BSU’s policies and procedures. This process will ensure our students receive due process while eliminating the Department of Nursing’s responsibility to respond to areas already covered by BSU. Any student concerns related to individual courses or course assignments must be discussed with the faculty assigned to that course. The faculty will remain the authority for classroom content and assignments.

We started a holistic admission process for the 4-Year Track program about two years ago, which included the addition of an interview to the current analytical basis for determining admission to the nursing program. As part of our HRSA grant, the faculty attended a workshop about holistic admissions and as a result we have been working to improve our process. This year the admission process will include an interview worth 30% of the admission rating, an experience and attributes portion worth 35% and a metric portion worth 35%. The metrics include overall GPA, prerequisite GPA and HESI admission exam score.

We have completed our first full year of using HESI. This includes the admission exam, in-program assessment exams and case studies, and an end-of-program live review for the pending graduates. There have been some areas of concern centered on the actual administration of the exams. We are working to smooth this process out.

**Faculty and Budget Committee (FAB)**
Two probationary track faculty searches were successfully held. FAB is always busy—new ideas, projects and considerations are always just around the corner. Our main work this year has been to support writing the self-study and organizing the CCNE site visit. It really felt like we were successful on Friday afternoon, November 17, 2017, when our CCNE visitors presented their preliminary report to nursing faculty and BSU administrators.

**Nursing Department Chairs Committee**
This committee, which works to improve communication between committees and with administration, is being formally added to our standing nursing department committees. Several of the projects for this group this year related to the self-study and our strategic planning.

**Student Forums**
The department hosted a student forum for the 4-Year Track students in early December, where a faculty member facilitated discussion about the strengths and weaknesses of the program from the students’ perspective. During spring semester the RN-BS group was offered a written method to provide similar feedback. The students who attended Student Nurses Day on the Hill were able to submit their comments at that time. The information collected at the forums is initially reviewed by the nursing chairs committee. The chairs then take the feedback back to the appropriate committees for review and consideration.
Niganawenimaanaanig Program (Formerly American Indian Nursing Initiative)

Niganawenimaanaanig, which is an Ojibwe word that translates to “we take care of them,” is a HRSA Nursing Workforce Diversity $2 million, 4-year project to recruit, retain, graduate and license indigenous nurses. The program had a very successful launching in the 2017-2018 academic year, providing cultural, academic, social and financial support to 13 indigenous students: 4 seniors, 6 sophomores, 1 pre-nursing and 2 RN-BS (junior). In 2018-2019, funding will be available for a minimum of 15 students.

Niganawenimaanaanig employs two full time staff—a student mentor (Donovan Sather) and a grant coordinator (Tammy Erickson). The student mentor meets weekly with students to address any academic or personal concerns that may create barriers to success. The mentor also assists the program director with recruitment efforts. The grant coordinator is responsible for the day-to-day management of the office and grant budget, as well as planning and organizing student activities. Dr. Misty Wilkie is the Niganawenimaanaanig program director.

With financial support from Bemidji State University, we were able to remodel a space in Bensen Hall for the Niganawenimaanaanig Student Lounge. This space provides an area for students to study or relax between classes.

Ribbon Cutting: Donovan Sather, Dean Colleen Greer, Tia Dahmen, President Hensrud, Alexa Brunelle, Dr. Misty Wilkie, Jineane Williams, Dr. Tony Peffer, Dr. Mary Fairbanks

Another aspect of Niganawenimaanaanig is to provide opportunities for students to meet and develop mentoring relationships with indigenous nurse leaders from across the country. Dr. Margaret Moss,
editor of *American Indian Health and Nursing*; Lieutenant Ira J. Wilkie, former Marine and current member of Navy Nurse Corps, and Ursula Knoki-Wilson, CNM and liaison for Indian Health Service, all came to BSU this year. These nurses spent time getting to know the students and gave presentations on their career or research journeys.

We are incredibly proud of our seniors, who will provide strong representation of Niganawenimaanaanig in their communities, careers, or as they pursue graduate studies.

**Camp Nursing**

Unfortunately the camp nursing graduate certificate program has been discontinued. The Association of Camp Nurses will be developing a certification through their organization.

**Scholarships Awarded for 2018-19**

**Total** $18,500
Student Nurses’ Association – Faculty Advisors: Marci Maple and Mary Fairbanks

The SNA is very active on campus and in the community. It has grown in the dedication of their student leadership. Activities during the year have focused learning and support of each other, understanding nursing as part of a larger national group, and commitment to the community. SNA students attended the statewide SNA convention and the National SNA convention – right through the April snow storm.

Nursing Faculty Were Asked: What Is Your Most Memorable Event as a Nurse?

Having a patient’s family, who I had given numerous transfusions to over the last several months to extend their life, request I be his nurse and care for him the last few hours of life. The greatest honor I have ever been given. –Leslie D.

I was working as an Oncology Nurse Navigator when a patient stopped in my office to chat with me. He was American Indian and was reserved in many ways. He was having financial hardships due to his cancer diagnosis, treatment, and transportation and I had been helping him as much as I could when he would allow. When he stopped in my office he thanked me for all I had done to help him. This moment was one of my favorites. I was never sure if I was invading this man’s personal space by calling him and checking on him or meeting him at his appointments, and come to find out, he appreciated it. He sat in my office for over 30 minutes just chatting; it was a very cool experience for me. –Carrie Y.

My most memorable moment as a nurse was watching a young man (mid-20s) be shocked after his heart went into v-tach/v-fib as a result of electrolyte imbalance from severe dehydration and use of ma-huang herbal supplement for energy. I was a brand new nurse working with another brand new nurse. Fortunately this event happened at the change of shift so we had four RN’s present. I will never forget how quickly he went downhill and what his body looked like as it was being shocked. And what is more vivid is his blood-curdling scream when he regained consciousness. His family later reported that he had lost a significant portion of his heart function as a result of this episode. –Misty W.

Students Were Asked To List Three of the Most Influential People from their Senior Year

There are many people I have met that have had an influence on my life since the beginning of senior year. Three that stick out the most to me are Nancy Haugen, Donovan Sather, and Misty Wilkie. Nancy has helped me critique my resume and cover letter and I feel very confident about them, whereas before I felt that they were mediocre. Donovan is my mentor for the Niganawenimaanaanig program for Native
American Nursing students. He has been a great mentor because he helps me when I am struggling in school and also helps me stay on track with the things I am needing to get done and also is beginning to help me learn how to be a working nurse instead of a nursing student by the structure of our meetings. Misty has been another mentor of mine through the grant program and I am thankful for her encouragement last semester. It was tougher for me and I felt like without her I may not have done as well as I did. She also helped me learn how to stop procrastinating and get my work done ahead of time which has aided in my success. These three people have helped me tremendously and I am very thankful to have met them all. –Anna

Another influential person in my life is Dr. Misty Wilkie. I admire her efforts and commitment to establishing the Niganawenimaanaanig “We take care of them” program to support American Indians in nursing. She was the student mentor this fall and I enjoyed all of her wisdom and knowledge each week. The best advice she gave me was to be empathetic for our patients not sympathetic. Also, she always promotes the importance of self-care for students. Even though, she stresses to view nursing school as a job. Throughout, my senior year it has been so beneficial to have a nursing mentor like her! –Samantha

The last influential person I have met since the start of my senior year would be Mary Fairbanks. She was my clinical preceptor last semester and I loved every minute of it. Once I told her I wanted to be a nurse in Red Lake after graduation she gave me the names of people to go to for help filling out an application and made sure I was able to get a capstone site at Red Lake. She is one of my favorite professors and I will always be thankful for the time I had with her. –Hannah

Senior Nursing professors: Our professors are probably the most influential people in my life besides my family. They really have become family. Examples of their influence include mentoring, teaching, and support. They are really there for you whenever you need. No matter if it is for educational, personal, or career based. These guys have truly been an inspiration. They have so much insight, and really show you what it truly means to be a nurse, and I have learned more from each one of them than just textbook material. –Maddison

The second influential person that I have met this year is the director for The Boys and Girls Club in Bemidji. She has made a large impact on the lives of many children, some who struggle every day at home. She strives to meet the children on a personal level and exemplifies a lifestyle they should follow. The third influential person I have met this year is my Preceptor at the hospital. She has taught me quite a bit in the short time that I have spent with her and she is a professional to a "T". I can see that the other nurses on the floor look up to her and respect her opinion; it makes me wish to be a nurse like her one day. –Haleigh

What’s Ahead for 2018 - 2019?

1. Continued review of our junior-year curriculum and clinical learning experiences.
2. Continued work integrating high definition simulation into all aspects of our pre-licensure program.
3. Continued evaluation of the RN-BS program, with the probable step of moving additional courses to an online format.

The BSU Department of Nursing faculty and staff are looking forward to the opportunities of another year and invite you along for the journey!

Community Appreciation Day
