What’s the Scoop?

**June 2: D2L System-Wide Update**
D2L will be updated to Version 10.7.0 on June 2, 2017. Along with tool enhancements, we will also get a new mobile-friendly responsive interface. If you would like a preview of the changes, please check out the following recording of a recent system-wide webinar.

[Link to Webinar Recording](#)

The June 2 updates will include:
- Update to Quiz Question Creation Process
- Improvements to Group Discussion Setup (with a single link to the Gradebook)
- Many Enhancements to Intelligent Agents
- Responsive Design for Mobile Devices (Daylight Experience)
- More…

**D2L Basic Tutorials Available Online**
Now you can access all of our basic D2L training tutorials directly from the [eLearning Support website](#).

These are the step-by-step tutorials that you receive when you attend a session in our office.

To find the tutorials, visit our website and then click on the [D2L Tutorials: Handouts and Videos](#) link.

This summer we will be adding short videos to accompany each of the tutorials. Stay tuned…

Happy Spring!

Frequently Asked Questions

**Q**: How do I make grade items “Extra Credit?”

**A**: In order for D2L to treat a grade item as extra credit, it must be marked as a “Bonus” item. That way, the points are not added to the total points possible in the course.

**To create an extra credit (Bonus) grade item:**
1. Click the **Assessment** menu and then click **Grades**
2. Click **Manage Grades**
3. Create a new grade item (or edit an existing grade item)
   a. Click the **New** button and then click **Item**
   b. Click **Numeric**
   c. Enter a **Name**
   d. Enter the **Maximum Points**
4. Click the **Bonus** box
5. **Save and Close**

Bonus items will be indicated with a yellow star in the Manage Grades area and will be marked with “(Bonus)” in the Enter Grades area.

**NOTE**: If you have Bonus items within a Category, you must edit the category and check the “Can Exceed” box.

---

I didn’t know I could do that!

You can easily rearrange your Content materials by dragging them to their new location.

1. Click the **Materials** menu, and then click **Content**.
2. Hover your mouse pointer over the three-line “handle” to the left of a Module or Topic. Your cursor will change to a four-sided arrow.
3. **Drag and Drop** the item to its new location.
