# Background on Native Americans

- In the beginning natives were not seen as equal to many colonizers.
- Many environmental as well as land disputes were made between the two
- Today Natives are not represented they make up 1% of the population but roughly 66% Natives are registered to vote.
- This is important because in order to actively represent the nation we need to have more Natives in office.

# Literature Review

- There has been research in the obstacles that minority faces -
- Kira Sombatmasu -
  - Diversity candidate theory, meaning that a candidate is more likely to be diverse in a Democratic district
  - In diverse candidates there are more likely to be men over women
- Drury R. Sherrod –
  - Maintaining cognitive consistency between their own position on issues and their candidate preferences.

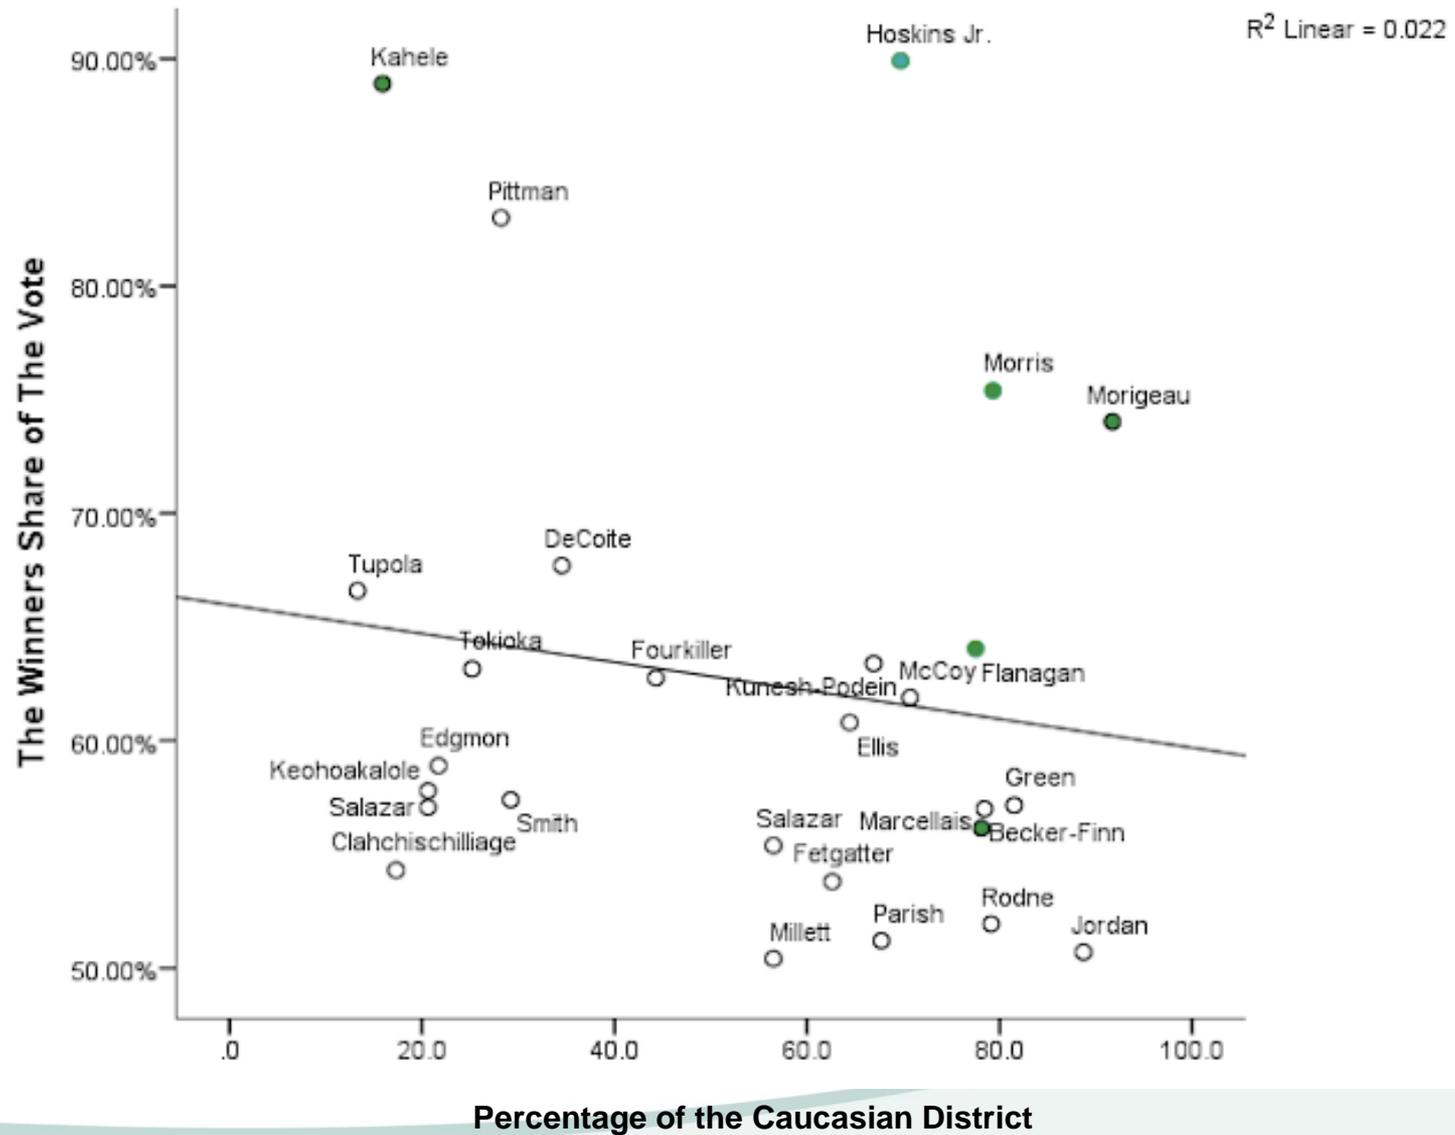

# Analysis

- I analyzed state legislative elections in which Native American candidates won.
- Using the data from the 2016 National Census and from University of North Dakota, Professor Mark Trahant.
- Creating an excel sheet breaking down the race, income, political party and share of the vote.

## Share of The Native Winners Vote in Caucasian Districts

# Representative Chuck Hoskins JR

- District 6 in Oklahoma
- Grew up in the area
- Strong Military background
- Elected member of the Cherokee National Tribal Council.
- District voted Trump in the 2016 presidential election

# Representative Peggy Flanagan

- Grew up in the St. Louis area most of life
- Strong DFL ties
- Serves as Board of Directives of Native Progress
- Minneapolis foundation
- Part of the White Earth Tribe
- District voted for Clinton in the 2016 presidential election

# Representative Jamie Becker-Finn

- Tied to the community
- Grew up in the Cass Lake-Bena school district
- Served in the AmeriCorps
- Heavy ties to politics having worked as a Legislative Assistant at the Minnesota House of Representatives.
- District voted Clinton in the 2016 presidential election
- The district is in the suburbs of the cities

# Representative Shane Morigeau

- Born and raised in Montana as well as went on to higher education in Montana.
- He was born in Missoula and grew up on the Flathead Reservation as a member of the Confederated Salish and Kootenai Tribes (CSKT).
- The district is a majority college town
- District voted Clinton in the 2016 presidential election

# Representative Jeff Morris

- Strong ties to the community
- Strong in creating renewable energy
- District voted Clinton in the 2016 presidential election
- The County consists of 176 named islands and reefs
- San Juan is a fishing destination, they are bordered with Canada by Vancouver.

# Senator Kaiali'I Kahele

- Grew up in a small fishing village.
- In the national guard & combat vet pilot
- Strong community ties
- His father used to serve as the senator in the district prior to him.
- District voted Clinton in the 2016 presidential election

# Conclusions

- That the districts that voted for natives, are the natives that mainstream themselves.
- The candidates are tied strongly to the communities and they are able to relate to the majority
- These would be the reasons that I thought that non natives would vote for natives.

# Implications

- Natives are running as primarily Democrat.
- The Natives that do run are not tied to their Reservation – most are tied to the party or community in which they ran in.
- The more native a district the more likely that a native candidate will be voted on.
- There needs to be more Native candidates in order to have more data.
