

Hidden Prerequisite Remedies

- 1) Remove the course with hidden prerequisites from the program or substitute a different course for it
- 2) Add the prerequisite courses as required courses in the program
- 3) Remove the hidden prerequisites from the course (if in your own department)
- 4) Add other (non-hidden) prerequisites as “or” options.
- 5) Add "or consent of instructor" to the course's prerequisites and confirm that the instructor would always agree to waive the hidden prerequisites for that course in that program.

Options 1) and 2) would require a revised Program form and new Signature Form; options 3), 4), and 5) would require a Course Modification form for each course and a new Signature Form.
