

Assessment Praxis for Higher Education

February 23, 2023

Bemidji State University, Memorial 300

8:00 a.m. to 12:00 p.m.

The skill of evaluation in higher education is central to advancing institutions forward. Evaluation must not be undertaken blindly. To ensure that evaluation praxis is informing decisions concerning diversity, equity, and inclusion, one must be informed of best practices. Learners will explore the impacts of evaluation on minority and marginalized student groups. Learners will also explore best practices, and action plans for implementing and engaging in evaluative praxis.
