

Disinfecting Electronics with Oxivir® Tb Wipes

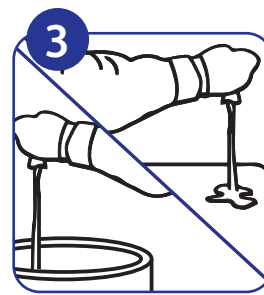

Preparation and Procedure

1 Put on gloves, per facility requirements.

2 Feed a wipe through the center hole in the container, secure the lid to the bucket, and pull off a wipe.

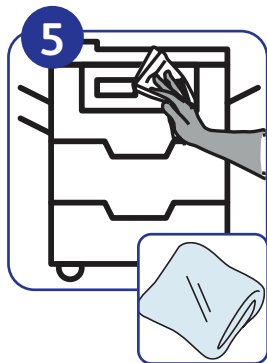

3 Express excess liquid into a sink or garbage bin prior to wiping any type of electronic devices, seams or ports. The wipe should be wet, but not dripping liquid.

4 Turn power off on electronic device.* Gently wipe electronic device using an Oxivir® Tb wipe. When cleaning a display screen, wipe in one direction.

Surfaces must remain wet for one minute.

5 Wipe with clean, damp cloth to remove any residue.

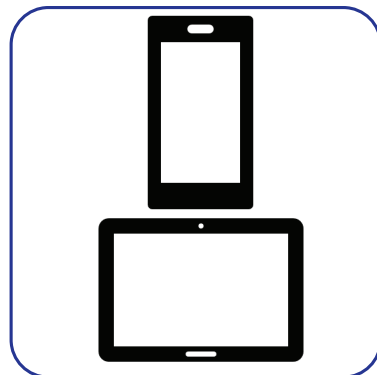

6 Discard gloves and wash hands.

*Refer to your company policy or manufacturer's recommendations for powering off electronic devices.

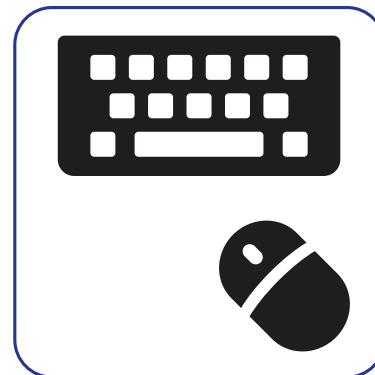

Preparation and Procedure

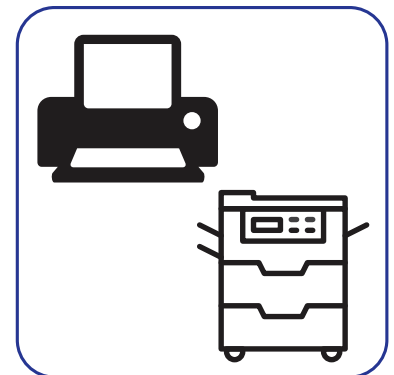

Monitors and Computers

Phones and Tablets

Keyboards and Mice

Printers, Scanners, Copiers

Oxivir® Tb Features

- One-step disinfectant cleaner that is safe for use around people; non-irritating to eyes and skin
- Demonstrated effectiveness against viruses similar to SARS-nCoV-2 (novel coronavirus) on hard, nonporous surfaces when used in accordance with the directions for use
- Effective against key pathogens – TB, MRSA, Norovirus and VRE
- Kills HBV, HCV and HIV in 1 minute. Tuberculocidal in 5 minutes and Fungicidal in 10 minutes.
- Environmentally responsible – active ingredient breaks down to oxygen and water
