

Bemidji State University Policies

Policy Name: Student Health Policy	Effective Date:
Policy Owner: AVP Student Life and Success	Last Review: 5/1/17
	Next Review: 9/1/19

Policy Statement

Bemidji State University policy states that all students enrolled for credit instruction and who are assessed the student health fee are eligible to use the health services available at the Student Center for Health and Counseling.

Scope and Purpose of Policy

The scope of this policy applies to all enrolled on-campus students carrying three or more academic credits. The purpose of this policy is to provide eligible students of the services available to them and to inform the university about the considerations of the services. The SCHC is required by law to maintain appropriate guidelines regarding the Health Information Portability and Accountability Act (HIPAA).

Definitions

Health Information Portability and Accountability Act is federal legislation that created national standards to protect the privacy of patients' medical records and other personal health information.

Procedures

Proof of student fee payment is required prior to service. A properly completed medical history form is essential to the Health Service staff in providing appropriate treatment and is required of all students prior to treatment. Failure to comply with either of these requirements may result in denial of service.

Students with health conditions that unreasonably endanger the safety and welfare of themselves and/or other members of the University community may be removed from the University and University facilities, have their enrollment canceled or be denied enrollment at the beginning of a semester if their condition persists. After considering available information, the Director of the Student Center for Health and Counseling, Student Affairs and the students' Academic Dean shall determine jointly whether these students shall have their current enrollment canceled or will be permitted to register.

Rationale

The rationale of this policy is to provide on campus services for student health care.
