

Transform Accessibility from Compliance Requirement to Competitive Advantage

Built into Brightspace. Makes Accessibility Simple.

Accessibility+ is an embedded solution in Brightspace that helps institutions, schools, and organizations meet accessibility goals with less effort. It leverages AI to automate 60% fixes, offers expert support when needed, and tracks content updates over time. The result is faster compliance, more inclusive experiences, and less time spent on manual work

What It Is

Accessibility+ works behind the scenes to audit and remediate Brightspace content without requiring extra tools or logins. It supports every user type, from learners and instructors to administrators and compliance teams, helping you deliver accessible content without disrupting your existing workflows.

Why It's Different

- Comprehensive audits of HTML, documents, media, and more across your Brightspace environment
- Automation handles up to 60 percent of common fixes, with expert support available for complex content
- Tracks accessibility across updates so you can maintain compliance as your courses and programs evolve
- Remediation is embedded directly in the Brightspace experience
- Institution-wide visibility to admins into accessibility progress and compliance trends

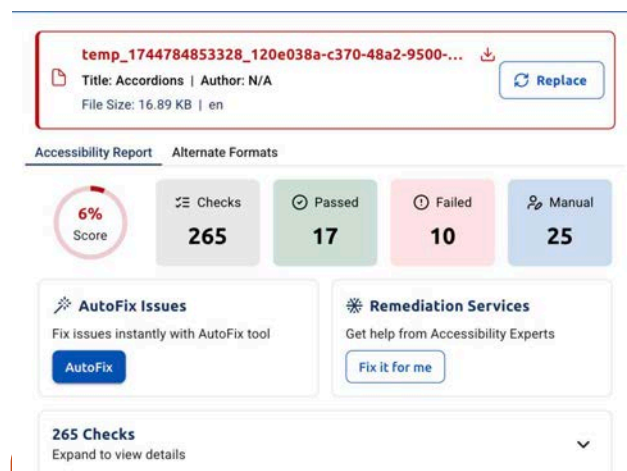

Who It's For

Higher Education – Reduce legal risk, improve student outcomes, and free up instructor time

K–12 – Deliver equitable access for all learners, even with limited resources

Corporate Learning – Support diverse teams with content that is inclusive and compliant

Government and Public Sector – Meet accessibility regulations confidently with full audit trails and reporting

Explore how Accessibility+ can help your institution or organization reduce manual work, stay compliant, and create more inclusive learning experiences..
