**Department Website:** http://www.bemidjistate.edu/academics/departments/geography

EMPLOYMENT AREAS AND PROJECTED DEMAND:
The “Occupational Outlook Handbook” (OOH) reports that surveyors, cartographers, photogrammetrists, and surveying and mapping technicians held about 117,600 jobs in 2016. The architectural, engineering, and related services industry—including firms that provided surveying and mapping services to other industries on a contract basis—provided the majority of jobs for these workers. Major Federal Government employers are the U.S. Geological Survey (USGS), the Bureau of Land Management (BLM), the National Oceanic and Atmospheric Administration, the U.S. Forest Service, and the Army Corps of Engineers. Most surveyors in State and local government work for highway departments or urban planning and redevelopment agencies. Utility companies also employ surveyors, cartographers, photogrammetrists, and surveying technicians.

OOH reports that the nationwide demand for cartographers and photogrammetrists is projected to grow much faster than average through 2026, with people established in their career generally earning between $39,740 and $99,800 per year. Cartographer’s median income was about $62,750 in 2016, while surveyors averaged $59,390 and surveying and mapping technicians earned an average of $42,450 per year.

PLACEMENT INFORMATION FOR GEOGRAPHY GRADUATES:
Of the Bemidji State University 2015-2016 Geography B.S. graduates 100% obtained related employment within one year of graduation.
